How to Play

Fill every empty square with a number from 1 to 9.

Each row, each column and each of the nine 3 x 3 boxes (outlined in thick lines) must contain every number from 1 to 9 exactly once.

The bold numbers are already in place. Every puzzle has exactly one answer, and you never need to guess.

Four levels, marked with dots

Easy (one dot, puzzles 1 to 50): many numbers are given, and each empty square can be worked out by looking at its row, column and box.

Medium (two dots, 51 to 100): fewer numbers given. You will often need to ask where a number can go, not just which number fits a square.

Hard (three dots, 101 to 150): you will need the third trick on the next page, and now and then the fourth.

Very Hard (four dots, 151 to 200): for confident solvers. These need the pairs trick too.

Tips

Use a pencil with a good eraser. Small notes in the corner of a square help on harder puzzles.

The answers are at the back, with the starting numbers in bold. Happy solving!
